CS506 Scrum Report 0
(Apply to all members)

---

1. **What have we worked on?**

   Our team has met and worked on completing deliverable 0. In our deliverable 0 file, we addressed the necessary questions and have begun to distribute tasks amongst ourselves, but they are tentative and roles may be switched going forward. We also are more familiar with the expected workflow/pattern we are supposed to follow to ensure a smooth/clear repository history by creating pull requests from our individual branches to the team branch.

2. **What will we be working on next?**

   Our team has planned to meet on a weekly basis to continue working towards completing the tasks listed under deliverable 1.

   Each member will work on the base question assigned to them.

3. **Have we run into any issues? Do we need help?**

   We initially had issues with making pull requests, but now that we understand the workflow, we do not anticipate any related issues going forward.

4. **Team Lead: Have I talked to the client recently? When are we meeting with them next?**

   This is not yet applicable.
